PROJECTS

Panchakanya Collections — [Demo](#) · [GitHub](#) 2026
Full-Stack E-commerce | Python, Django, PostgreSQL, Cloudinary, Render, HTML/CSS/JS

- Built and deployed a full-stack e-commerce platform with product/category management, search and filtering, cart, wishlist, reviews, authentication, and admin workflows.
- Designed database-driven features with PostgreSQL and integrated Cloudinary for media management, then deployed the application on Render.

BloggerNepal — [Demo](#) · [GitHub](#) 2025 – 2026
Full-Stack Blogging Platform | Django, DRF, Docker, GitHub Actions, Azure

- Built a full-stack blogging platform using Django and Django REST Framework with authentication, blog management, search, analytics, and content recommendation features.
- Containerized and deployed the application with Docker, PostgreSQL, Azure, and GitHub Actions for automated build, test, and deployment workflows.
- Wrote database management commands to seed and structure data from a JSON-based blog dataset, and resolved schema/migration issues to keep deployments reliable through active development.

RentMS — Rental Management System — [Demo](#) · [GitHub](#) 2026
Rental Management System | Python, Django, DRF, PostgreSQL, Docker, Azure, Render

- Built a full-stack rental management system connecting landlords and tenants with property management, authentication, and rental workflows.
- Implemented backend APIs and deployed the application with PostgreSQL on Azure and Render, gaining hands-on experience with production configuration and cloud deployment.

Django JWT API — Token Authentication System · [Demo](#) · [GitHub](#) 2025
Personal project | Python, Django REST Framework, PostgreSQL, JWT

- Built a REST API with JWT-based authentication, user registration, login, token refresh, and protected API endpoints.
- Implemented role-based access control and permission handling to secure API resources and manage authenticated user access.

EXPERIENCE

QA Tester & Content Contributor | Remote 2023 – 2024

- Tested web applications, identifying bugs, usability issues, and areas for feature and UX improvement.
- Provided structured feedback to support debugging and improve application quality.
- Contributed content and performed structured data validation for web-based applications and mapping projects.

SUMMARY

CSIT student and Full Stack Developer focused on building practical web applications with Python, Django, Django REST Framework, and PostgreSQL. Built and deployed multiple full-stack projects with authentication, REST APIs, database-driven features, responsive interfaces, and cloud deployment. Strong interest in learning through real-world development, solving problems independently, and contributing to client-facing software.

SKILLS

Languages & Frameworks

Python	Django
Django REST Framework	REST APIs

Web Deployment

HTML	CSS
JavaScript	Authentication
Responsive Web Development	

Database

PostgreSQL	MySQL
------------	-------

DevOps, Cloud & Deployment

Microsoft Azure	Render
Docker	GitHub Actions (CI/CD)
Cloudinary	

Tools

Git	GitHub
Linux/CLI	Postman

EDUCATION

B.Sc. Computer Science and Information Technology (CSIT) 2022 – Present
Kathmandu College of Technology, affiliated with Tribhuvan University
