PROJECTS

BloggerNepal 2025 – 2026

Final-year academic project & personal initiative | Django, DRF, Docker, GitHub Actions, Azure

- Built a Django/DRF backend for a centralized, Nepal-focused blogging platform with authentication, post creation and editing, content recommendation, and analytics, then containerized it with Docker and deployed it to Azure.
- Set up a GitHub Actions CI/CD pipeline to automate build, test, and deployment steps on every push.
- Wrote database management commands to seed and structure data from a JSON-based blog dataset, and resolved schema/migration issues to keep deployments reliable through active development.

Panchakanya Collections 2026

Personal project | Python, Django, PostgreSQL, Cloudinary, Render, HTML/CSS/JS

- Built and deployed a full-stack jewelry e-commerce platform with product/category management, search and filtering, cart, wishlist, authentication, and an admin dashboard, using PostgreSQL and Cloudinary media storage on Render.
- Adopted industry-standard practices — modular Django settings (base/dev/prod), uv-based dependency management, and CSV-driven data seeding — for a clean, deployment-ready project structure..

RentMS — Rental Management System 2026

Personal project | Python, Django, PostgreSQL, Docker, Azure, Render

- Built a full-stack rental management system connecting landlords and tenants, with admin management features and a complete property rental workflow.
- Implemented REST APIs, deployed the application on both Microsoft Azure and Render with PostgreSQL, and used CSV-based sample data to populate the database.

Student Portal System 2025

- Built a student portal with note management, homework tracker, and to-do list as a centralized study resource hub; deployed on Render with PostgreSQL.

EXPERIENCE

QA Tester & Content Contributor 2023 – 2024

Remote

- Tested web applications built by a senior developer and provided detailed bug reports and UX enhancement suggestions; also contributed content to a Firebase-powered quiz application and assisted with hotel data entry for a travel application.

SUMMARY

CSIT student and Full-Stack Developer experienced in building web applications using Python, Django, Django REST Framework, and PostgreSQL. Skilled in designing REST APIs, secure authentication flows, and responsive user interfaces. Proficient in deploying and automating applications with Docker, GitHub Actions, Render, and Microsoft Azure. Seeking a Python/Django role to contribute to production-grade projects and further develop technical skills.

SKILLS

Languages & Frameworks

Python	Django
Django REST Framework	

Database

PostgreSQL	MySQL
SQLite	

DevOps, Cloud & Deployment

Docker	GitHub Actions (CI/CD)
Render	PythonAnywhere
Cloudflare	AWS
Microsoft Azure	

Frontend

HTML	CSS
JavaScript	

Tools

Git	GitHub
VS Code	Postman
Linux/CLI	

EDUCATION

BSc. Computer Science and Information Technology (CSIT) 2022 – 2026

Kathmandu College of Technology, affiliated with Tribhuvan University
